# Solution proposals

Solutions and technical support for customer system development

◆**Planning, development, and customer support of discrete and LSI products that are main parts in each system**

Scanners

Printers

PPCs

Robotics

Vending machines

Currency equipment

Smartphones

OA equipment

Projectors

Tablet device

Battery powered appliances

Discrete, LSI

Industrial equipment

Wireless Earbuds

Smart Watches

Consumer equipment & Home appliances

Card readers

Sewing machines

Refrigerators

Air conditioners

Washing machines

Solution proposals

◆**Solutions and technologies to support the customer's entire system development**

		Concept and parts selection	Board and software development	System development and test	Mass production
Solution	Hardware	Evaluation board and starter kit	Reference design (Circuit diagram, parts list, layout)		
	Software	Sample software (Standard software)		Sample software (Application software)	
	Document	Datasheets, catalogs, Web contents (Videos, e-learning, etc.)	Application notes (Board design guide, etc.)		
Technical support		Seminars, reference model development support	Software development support	Test support (Function test)	Analysis support
