The Essence of Toshiba

The Essence of Toshiba is a statement of our unwavering credo as an organization. It has three components. The Basic Commitment of Toshiba Group, Our Purpose, and Our Values.

• Basic Commitment of The Toshiba Group
  Our enduring credo: What we believe and promise to deliver.

• Our Purpose
  Our reason for being: Inspired by the credo, the difference we make for customers and society.

• Our Values
  Our shared beliefs: A guide to action and the thorough implementation of Our Purpose
Basic Commitment of The Toshiba Group

Committed to People,
Committed to the Future.

At Toshiba, we commit to raising the quality of life for people around the world, ensuring progress that is in harmony with our planet.

Our Purpose

We are Toshiba. We have an unwavering drive to make and do things that lead to a better world.

A planet that’s safer and cleaner. A society that’s both sustainable and dynamic. A life as comfortable as it is exciting.

That’s the future we believe in. We see its possibilities, and work every day to deliver answers that will bring on a brilliant new day.

By combining the power of invention with our expertise and desire for a better world, we imagine things that have never been—and make them a reality.

That is our potential. Working together, we inspire a belief in each other and our customers that no challenge is too great, and there’s no promise we can’t fulfill.

We turn on the promise of a new day.

Our Values

Do the right thing
We act with integrity, honesty and openness, doing what’s right—not what’s easy.

Look for a better way
We continually strive to find new and better ways, embracing change as a means for progress.

Always consider the impact
We think about how what we do will change the world for the better, both today and for generations to come.

Create together
We collaborate with each other and our customers, so that we can grow together.
Committed to people, Committed to the future.
We make and do things that lead to a better world.

In a dynamic business environment, where IoT and AI continue to drive technology advances and create new potential, we are determined to secure Toshiba’s leadership in promoting new technologies and pioneering new markets, and to shape the organization we need to secure sustained development.

Toward that, we have now issued the “Essence of Toshiba”. Grounded in our long-standing statement of intent, “Committed to People, Committed to the Future”, the Essence is a restatement of the values that have guided Toshiba for over 140 years, as we have taken our business to the global level, and that still inspire us today as we work for a sustainable future.

The introduction of the Essence allows Toshiba Group employees everywhere to realign themselves with Toshiba’s identity, to understand how we aim to grow as a group that promotes progress for a better world, and to continue to turn on the promise of a new day.

The future demands solutions. Mankind must address climate change, meet rising energy demand, and overcome resource depletion. Our stakeholders also have high expectations that we will contribute to a more sustainable future through sound ESG management (environment, society and governance), and by promoting initiatives to help achieve the global SDGs. Toshiba Group supports the universal principles, including human rights, labor, the environment and anti-corruption, advocated by the United Nations Global Compact, and by observing the restated Basic Commitment of the Toshiba Group, we will pursue CSR management that meets stakeholder expectations.

Our sights are set on the century to come, our goal is to be a group that continues to be needed by society and that enjoys its trust. Our core mindset has always been to create, a venturesome spirit. This has allowed us to break new grounds in many areas, and to contribute to the evolution of daily life and social development. As we put past accounting irregularities and our recent financial crisis forever behind us, we will leverage the strengths and capabilities of our employees everywhere to harness our vision and strengths in technology, manufacturing and solutions.

We will grow as a corporate group that has the trust of all stakeholders.

Nobuaki Kurumatani
Chairman and CEO

Satoshi Tsunakawa
President and COO

October 2018

*SDGs: Sustainable Development Goals. Adopted by the UN in 2015, with achievement in 2030 as the target.

*SDGs: Sustainable Development Goals. Adopted by the UN in 2015, with achievement in 2030 as the target.*
A corporate group with secure earning power

Aiming to become one of the world’s leading CPS technology companies

Social problems such as energy shortages, resource depletion and climate change are intensifying on a global scale. Toshiba Group tackles these challenges head-on and provides countermeasures based on technology through its business activities.

The universe of cyber physical systems (CPS) is expanding. CPS interlinks the physical world of reality and tangible things, with the cyber world of digital virtual space. It collects information and data in various fields, analyzes it in cyberspace using AI and digital technologies, and then feeds it back to the physical world as information and knowledge that can easily be utilized to create added value.

At Toshiba, we are merging our experience and achievements in the physical fields of key devices and core components, cultivated over long years in the manufacturing sector, with cyber technologies centered on operations and services that utilize vast amounts of data, in order to promote the optimization of various products and systems. At the same time, we are also engineering our own “digital transformation” by utilizing IT systems to transform business processes inside Toshiba Group, and thereby build a firm position as a CPS technology company.
Executing the "Toshiba Next Plan"

We are achieving these goals with the "Toshiba Next Plan" our medium- to long-term management plan for the five years from fiscal 2019 that will enhance the potential of the Toshiba Group and improve shareholder value by maximizing corporate value. The Toshiba Next Plan includes measures that focus on enhancing core earning power and intensive investment in growth areas. We will achieve the first of these through comprehensive implementation of structural reforms, procurement reforms, sales reforms and process reforms. Our investments in growth focus on channeling resources into business domains where certain income growth can be achieved, thereby securing organic growth.

Our initiatives for future growth are focused on research and technical development of secondary lithium ion batteries that provide excellent safety and rapid charging; high efficiency power devices used in the control of all kinds of equipment; and the field of precision medicine, including heavy ion radiotherapy.

Toshiba Group's business domains

Toshiba Group will develop as an outstanding company, with the power to earn and grow, and the ability to contribute to the resolution of social challenges in a wide range of businesses, by concentrating on four business domains: Social Infrastructure, where Toshiba TEC Corporation offers retail and printing solutions and Toshiba Infrastructure Systems & Solutions Corporation delivers expertise and buildings/facilities, railway/industrial systems, and public infrastructure; Energy, handled by Toshiba Energy Systems & Solutions Corporation; Electronic Devices, centered on Toshiba Electronic Devices & Storage Corporation; and Digital Solutions, where Toshiba Digital Solutions Corporation takes the lead.
Energy Business Domain

Creating Sustainable Societies

Power systems are indispensable for contemporary lifestyles, and demand is expected to remain vigorous worldwide. Leveraging expertise cultivated since the company’s foundation, Toshiba Group creates energy infrastructure that enriches quality of life for people throughout the world. In order to ensure stable supply of electricity, we offer hydro, solar, geothermal and wind power generation facilities in the renewables space, as well as thermal and nuclear power generation systems.

We are also a leading supplier of power transmission and distribution systems that deliver electricity to homes, commercial facilities and other users; rechargeable batteries for the efficient storage of energy; hydrogen-based autonomous energy supply systems utilizing renewable energy and hydrogen; and energy aggregation services that integrate and adjust the balance of supply from distributed energy resources and demand from facilities and electric vehicles.

• Large-scale Power Generation systems

• Renewable Energy

• Transmission and Distribution / Energy Storage
Social Infrastructure Business Domain

To Realize a Sustainable Society that is Safe, Secure and Reliable

Through a comprehensive portfolio of tried-and-tested solutions, Toshiba Group supports the realization of a safe, secure and reliable sustainable society at the global level. For public infrastructure, we offer systems and solutions covering water supply and sewerage, highways, disaster prevention, broadcasting, telecommunications, security and automation, railways, motors and inverters. For buildings and facilities, we offer energy-saving, eco-friendly solutions for elevators & escalators, air-conditioners, and lighting offering higher levels of comfort. We also offer retail & printing solutions that support the retail sector, logistics and business, lithium-ion rechargeable batteries for hybrid electric vehicles, and energy storage systems for rolling stock.

• Infrastructure Systems & Solutions
  - Water Treatment Systems
  - Air Traffic Control Systems
  - Broadcasting Systems
  - Railway Systems
  - Security and Automation Systems
  - Industrial Systems

• Building Solutions
  - Lightings
  - Air-conditionings
  - Elevators

• Retail & Printing Solutions
  - POS System

• Battery
  - Lithium-ion Rechargeable Battery
Our semiconductor and storage products will always be a driving force to change the world

In the era of big data, you either sink or swim in the sea of information. In fact, state-of-the-art electronics are contributing more than ever, from cutting energy consumption to the control and operation of automobiles. Toshiba Group promotes advances in products that help all of us to live more comfortably and safely.

In the discrete semiconductor business, we focus on the power devices that control equipment power consumption. Our system LSI business offers dedicated ICs for automotive and industrial applications. In the HDD business, we lead the way in large capacity enterprise drives for data centers and servers. We provide the semiconductor industry with cutting-edge manufacturing equipment, including electron beam mask writers. Last not but least, we further contribute to society through our high functional, high value added materials and components, including fine ceramics and thermal print heads.
Digital Solutions Business Domain

Lead Digital Transformation and Co-create New Value Propositions in Global Society

Toshiba Group takes full advantage of know-how cultivated in over 140 years of experience in the social infrastructure business and manufacturing, and of expertise gained from a wide range of industries and worksites.

We combine these with our latest advances in IoT and AI, and co-create new value propositions with our customers in industry and with society.

We have devoted years of effort to the development of AI technologies and to promoting “Toshiba Communication AI RECAIUS” and “Toshiba Analytics AI SATLYS”. Our aim is not only to connect things but also to develop a deep and comprehensive understanding of human intentions and situations that brings a new level of understanding to communications between people and machines.

We will continue to contribute to creating a comfortable and safer society for people worldwide, to apply our latest digital technologies to business transformations, and to promote Co-Creation that enables open innovations that extend far beyond the boundaries of companies, industries and regions.
CSR and Environmental Management

Toshiba Group places top priority on human life, safety and legal compliance, and contributes to the solution of problems facing global society through business.

CSR Management

**Toshiba Group’s CSR**

With “CSR management” as the cornerstone of management policy, we proactively promote CSR activities and report the results to our stakeholders, including customers, shareholders, investors, suppliers and employees. We have been a signatory to the United Nations Global Compact since 2004, and as a leading global enterprise we uphold its principles of respect for human rights, labor standards, the environment and anti-corruption in all of our activities.

Social Contribution Activities

Our social contribution activities are inspired by the Toshiba Group slogan, “Committed to People, Committed to the Future. TOSHIBA,” and rooted in the communities in which we work. In FY2017, over 1,500 social contribution activities were carried out around the world.

- Toshiba Science Museum

Since its FY2014, move to new premises, a prime site adjacent to JR Kawasaki Station, Toshiba Science Museum has been even more effective in supporting science and technology education. People of all ages can have fun while learning through extensive hands-on experiences. Multinational support is offered in Japanese, English, and Chinese.

- Science Technology Competition (North America)

Toshiba Group works with the National Science Teachers Association to host the ExploraVision Awards (EVA), a science and technology competition in which the participants—students from kindergarten through to grade 12—make predictions about the technologies that they believe will become feasible within 20 years based on today’s science and technology. EVA was launched in 1992, and over 390,000 students from the United States and Canada have participated in the competition.

Environmental Management

In “Environmental Vision 2050,” Toshiba Group envisages a mid-century world where people lead affluent lifestyles in harmony with the earth. In working to realize that vision, Toshiba Group has set itself the long-term goal of increasing eco-efficiency in FY2050 to 10 times the FY2000 level. Eco-efficiency can be expressed as a fraction, with value as the numerator and environmental impacts as the denominator. It can be improved significantly by simultaneously increasing added value while decreasing environmental impacts. Toshiba’s ultimate objective is to contribute to realizing a sustainable society, and towards this we are accelerating initiatives in three areas: reduce environmental impacts in manufacturing processes; improve the environmental performance of products and services; and reinforce the foundations of environmental management, such as compliance, human resource development, and communications.
Research and Development

Toshiba Group will contribute to a sustainable society by creating new value with reliable technologies, through our focus on our main business domains, Social Infrastructure, Energy, Electronic Devices and Digital Solutions. Toward realizing our vision, we provide “substantial solutions” created through connections with customers and our various products, having our technological assets, capabilities to develop and manufacture products, and research competence as driving forces.

R&D Structure

Toshiba Corporation’s research centers — the Corporate Research & Development Center, the Corporate Software Engineering & Technology Center, and the Corporate Manufacturing Engineering Center — pursue group-wide R&D in basic technologies. Outside Japan, we have R&D facilities in the United States, Europe and China, and software development centers in India, China and Vietnam. Together with technological divisions in our worldwide business units, Toshiba Group’s R&D organization ensures cutting-edge R&D and software development around the world.

Intellectual Property Strategy

Guided by the concept of "All for IP-driven contributions to business", with social infrastructure at the core, we advance Toshiba Group’s intellectual property strategy and use our IP to promote business development across the Group’s businesses. We endeavor to ensure that our efforts make effective contributions to the Group’s regeneration.

Global Patent Portfolio

Toshiba Group is building optimal portfolios in its business domains.

World-first and Japan-first Products and Services

Toshiba has released numerous world-first and Japan-first products and services since it was founded in 1875. While cultivating a new round of growth for the next generation and beyond, Toshiba Group is resolved to meet customer needs with advanced technologies, and to create products and services that delight and surprise.

Toshiba Firsts of Their Kind in Japan and the World

History and Chronology

The tireless curiosity and passion for invention of Toshiba’s two founders are the source of Toshiba’s corporate DNA. We continue to draw inspiration from their examples.

Hisashige Tanaka (1799-1881)

Known as the “genius of mechanical wonders,” Hisashige Tanaka was one of Japan’s greatest inventors during the late Edo (1603-1868) and early Meiji (1868-1912) periods. His long list of inventions includes the “Man-nen dokei” chronometer. In addition to his brilliant craftsmanship, he was well versed in Western technologies, including telegraphy and steam engines. In 1875, at the age of 76, he opened a shop-cum-factory in Ginza, Tokyo, that manufactured various devices, most notably telegraph equipment. This is recognized as the origin of Toshiba.

Ichisuke Fujioka (1857-1918)

The “father of electricity in Japan,” Ichisuke Fujioka’s pioneered Japanese research into electric lighting. He met Thomas Edison when visiting the United States on a Japanese government mission and on his return devoted himself to the development of Japan’s first incandescent lamps. Fujioka founded a company, Hakunetsu-sha, in 1890, to manufacture light bulbs.

**DATE**

Jul. 1875  A shop-cum-factory (called Tanaka Seizo-sho from 1882; later Shibaura Engineering Works Co., Ltd.) opened in Tokyo.

Apr. 1890  Hakunetsu-sha Co., Ltd. (from 1899 Tokyo Electric Company) founded.

Jun. 1904  Shibaura Engineering Works Co., Ltd. established.

Sep. 1939  Shibaura Engineering Works Co., Ltd. merged with Tokyo Electric Company to become Tokyo Shibaura Electric Co., Ltd.

Jul. 1978  English official trade name of the company became “Toshiba Corporation.”

Apr. 1984  Japanese official trade name of the company became “Toshiba.”

Jul. 2001  Changed registered headquarters from Kawasaki city Kanagawa, to Minato ward Tokyo.

Mar. 2003  Transferred electric equipment for manufacturing plants business to TMA Electric Corp. (now Toshiba Mitsubishi-Electric Industrial Systems Corp.)

Oct. 2009  Acquired HDD business from Fujitsu Ltd.

Oct. 2010  Merged mobile phone business with that of Fujitsu Ltd. and transferred the business to Fujitsu Toshiba Mobile Communications Ltd. (now Fujitsu Mobile Communications Ltd.)

Jul. 2011  Acquired Landis+Gyr AG and its group of companies.

Mar. 2012  Transferred all shares of Toshiba Mobile Display Co., Ltd. to Japan Display Inc., a company established with funding from Innovation Network Corporation of Japan, Toshiba Corporation, Sony Corporation and Hitachi, Ltd.

Jun. 2017  Transferred an 80.1% stake in Toshiba Lifestyle Products & Services Corporation to Midea Group Co., Ltd.

Mar. 2017  Westinghouse Electric Company filed for rehabilitation under Chapter 11 of the U.S. BankruptcyCode, and as a result was deconsolidated from Toshiba Group.

Apr. 2018  Toshiba Memory Corporation started business.

Jul. 2018  Split off in-house companies into wholly-owned subsidiaries: Toshiba Infrastructure Systems & Solutions Corporation; Toshiba Electronic Devices & Storage Corporation; and Toshiba Digital Solutions Corporation. Sold all shares of Landis+Gyr in an IPO.

Jun. 2019  Transferred all shares of Toshiba Memory Corporation; reinvested in company. (now an affiliated company accounted for by the equity method)

Oct. 2019  Transferred an 80.1% stake in Toshiba Client Solutions Co., Ltd. to Sharp Corporation.
